# Good reasons for Parador

## Philosophy

We live for products that make every home the most beautiful home in the world. Our value compass points the way: Innovative, sustainable and ecological, we are committed to the highest quality standards in all aspects of our company. In the process we always keep our feet on the ground – the basis of our success.

## Inspiration & Design

The contemporary design of our floors is influenced by the latest trends from art, design, architecture and lifestyle. This inspiration is taken up by our design team, which transforms them into innovative and special looks that turn our products into trendsetters of living space design with an outstanding ecological balance.

## Quality & Materiality

Parador offers aesthetic flooring concepts for every application, which are produced from high quality and recyclable materials. An authentic look, functional design and the environmentally friendly selection of materials enable the implementation of sophisticated "Made in Germany and Austria" living ideas.

## Technology

In order to make laying by hand simple and effective, Parador offers intelligent click connections or high-quality adhesive systems that ensure long-term stability, depending on the product. From use in damp rooms to the integration of underfloor heating, flooring from Parador provides the perfect solution in premium quality for every context.

## Healthy living

The production of environmentally friendly products is a key concern for us and is firmly anchored in our corporate philosophy. Our floors promote healthy living, are low-emission and create a pleasant living environment. We mainly use natural raw materials which are subject to constant review.

## Sustainability

As a traditional wood processing company, the high regard for the environment is the foundation of our work. For this reason, we want to set standards in all aspects of ecologically responsible production – from raw materials to finished products to logistics.

**PARADOR**

# Eco Balance – Innovative and ecological

Modern living opens up different dimensions: in addition to demand for the highest quality and outstanding design, it also includes aspects such as residential health and the sustainable use of resources. With the Eco Balance series, we are reacting to the increased demands on all aspects of modern living and seek to balance style and ecology. A sustainable production method and particularly prudent use of natural raw materials prove our commitment to environmental compatibility and healthy living.

With the Eco Balance series, we want to prepare the ground for a future that finds innovative answers to the ecological challenges of our time. The Eco Balance product range includes engineered wood flooring, laminate flooring and the elastic floor covering Eco Balance PUR.

# Eco Balance PUR

The modern and versatile polyurethane material – in short PUR – gives the Eco Balance PUR flooring a special elasticity, which protects the joints, makes it warm underfoot and at the same time durable. Free of softeners and harmful emissions, this low-noise floor covering is resource-conserving and in particular promotes healthy living. The surfaces and decors succeed in authentic form and feel, and take up current design trends. The integrated acoustic counter layer made of cork smooths out bumps in the substrate and supports the particularly pleasant room acoustics. With the “Made in Germany” distinction, Eco Balance PUR guarantees the highest standards of quality and design.

## Product advantages

Quiet and warm underfoot

Suitable for underfloor heating

Safe-Lock® PRO

## Product structure

① **PUR layer**  
highly abrasion-resistant polyurethane top layer

② **Printed decor layer**  
Brilliant, authentic look

③ **Functional layer**  
High shape and dimensional stability

④ **HDF core board**  
with enhanced swell protection

⑤ **Cork counter layer**  
Enhanced room acoustics

⑥ **Patented click mechanics**  
custom-fit and connection stable

# Skirting boards and accessories

When the floor is selected, the skirting boards suitable for the decor create the perfect wall ending for an impressive appearance. Their different shapes give the floor its individual frame profile. Inside and outside corners as well as end caps and transition caps hide saw cuts. The mounting by means of the practical clip technology or for gluing is easy and installation-friendly.

A perfect overall impression is a question of detail: as a system supplier, Parador keeps the exactly matching accessories available for laying and maintenance. Special tools and adhesives make laying simple. The cleaning and care products matched to every floor covering ensure that the joy of Parador flooring and its value last a long time.

At [www.parador.eu](http://www.parador.eu) we present our entire range of services. With the catalogue and hand sample order, room and material planner and the availability checker we make many helpful tools available to visitors with whom working with Parador floors becomes a real pleasure.

**Skirting board SL 6**  
Moulding clip blue or for gluing

**Skirting board SL 18**  
Moulding clip red or for gluing

**Skirting board SL 21**  
for gluing; covers existing mouldings and tiles

**Underlays**

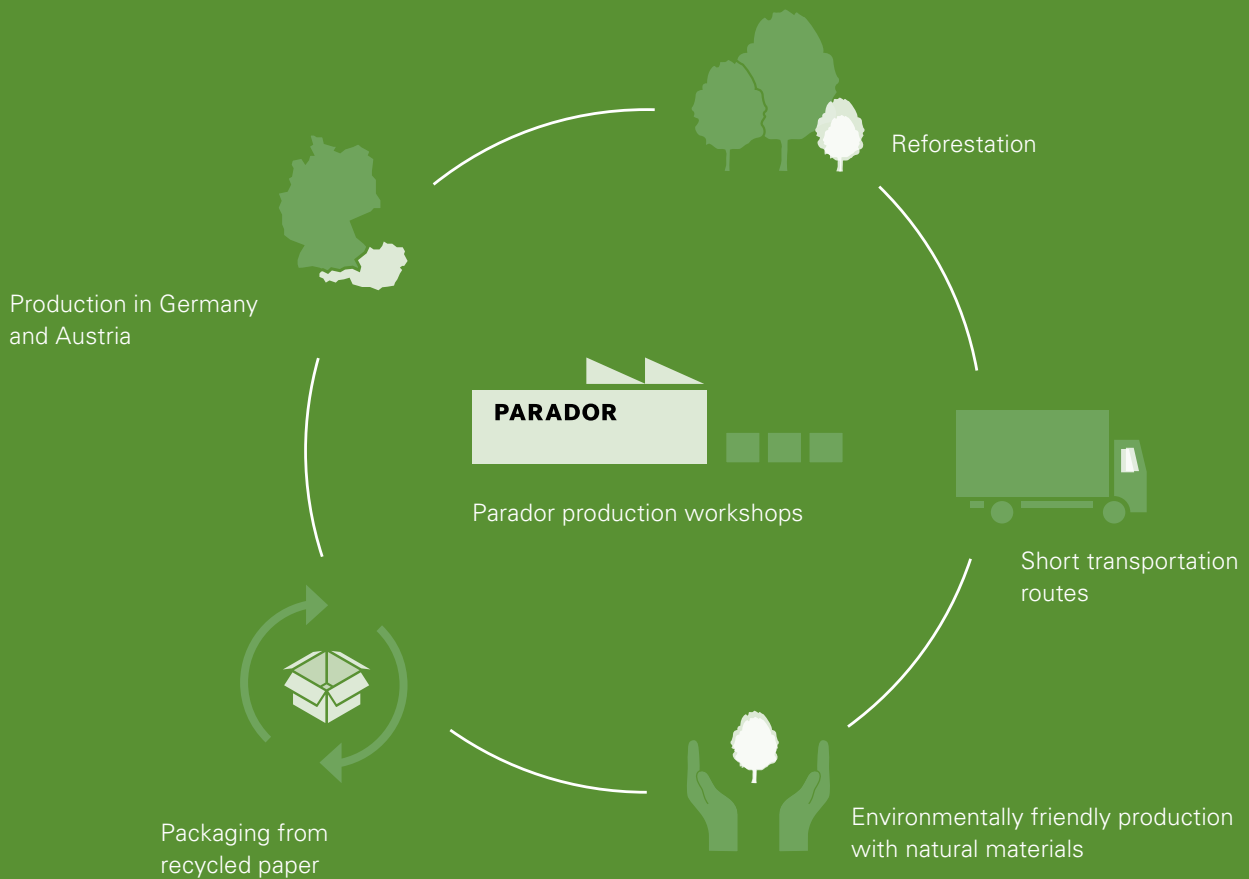

The range of applications is as diverse as the products. In order to enjoy your new floor for a long time, a suitable underlay should be used between the laying surface and flooring product. This optimises not only the footfall sound insulation and the walking sensation, but also insulates the floor against moisture from mineral floors such as screed.

**Profiles**

Parador profiles combine, bridge and create finishes for a floor aesthetic that is perfect in every respect. With the designs in aluminium anodised silver and stainless steel elegant accents can be set.

# Sustainably setting standards

# Certified security from responsibility

As a brand manufacturer, Parador is fully and continuously certified by independent institutions. Production processes, materials, resource and environmental management, as well as product quality, meet the high corporate values of a brand with responsibility, in addition to the legal requirements. Our quality requirement for elastic floor coverings Eco Balance PUR goes beyond legal requirements, which is proved by the various certifications.

EN 14041:2004/AC:2006

## EN 14041:2004/AC:2006

The CE marking is obligatory according to EU law in connection with product safety.

## Émissions dans l'air intérieur (Klasse A+)

This national classification valid in France indicates the quality of indoor air.

[www.blauer-engel.de/uz176](http://www.blauer-engel.de/uz176)

## The Blue Angel

The "Blue Angel" has certified Parador laminate flooring as a low-emission product. The eco-label RAL-UZ 176.

## PEFC™

This trademark is awarded to products that meet the requirements of the certification system for the documentation and improvement of sustainable forest management with regard to economic, ecological and social standards.

## TÜV Rheinland

Parador vinyl flooring has earned the TÜV certification mark thanks to its perfect product quality, product safety, understandable user documentation and the independent monitoring by the objective institute TÜV Rheinland Germany.

# Good reasons for Parador

## Our stance

As a traditional wood processing company, we have a special awareness of our environment. For us at Parador, sophisticated living goes hand in hand with the responsibility to preserve nature for future generations. This includes the sustainable use of our resources. Every product made of wood is an active contribution towards climate protection. As a vital carbon store, wood products are increasingly entering people's consciousness, especially in the field of construction and renovation. Products made of wood and wood materials are sustainable and help to secure the future of the next generations.

## Production

Our main raw material is wood from predominantly sustainably managed forests. We offer exclusively real wood from controlled sources of supply. The demand for transparency spans all aspects of the value chain and is documented in defined environmental standards for our suppliers. Our production is characterised by the avoidance of emissions and the return of reusable materials into the production cycle, short transport distances and the use of recyclable materials.

## Commitment

Parador is the first and so far the only producer of floor coverings to be EMAS-certified. In this way, we are committed to constantly optimising our environmental management: the requirements and components of EMAS include the involvement of all the company's employees, transparent and sustainable communication with the public, continuous improvement of our own environmental performance and compliance with applicable legislation. EMAS is recognised worldwide as the most demanding system for sustainable environmental management.

## Society

We have been involved with the "Plant for the Planet" foundation since 2011, whose goal is to put a stop to the climate crisis. Against this background, Plant for the Planet has set itself the task of planting a trillion new trees worldwide by 2020. Parador is supporting the initiative with tree planting and the organisation of children's academies. In the meantime, we have trained 550 children to become climate ambassadors and have planted 110,000 trees.
